To whom it may concern:

Having the Frontline processing system in our office has been of great value to us at D. Hughes Construction and Concrete Pumping, Inc. We have several clients that like to pay with a credit card when we do COD jobs. It is very convenient for us to charge the cost of the work order and not have to worry about the drivers losing a check payment in transit.

I would highly recommend this service to anyone who would like to make processing payments easier.

Thank you,
